

Customer Case Study

Bishop Sports

Company Overview

Situated in Slough, Bishop Sports is a specialist mail order sports company, providing sports and associated equipment to the educational sector

The Challenge

The company produces an average of more than 2,000 sales and purchase documents a month. Following a period of sustained business growth, which saw a significant rise in the volume of accounts related documentation being produced, the company took the decision to review the way it managed its accounts processes.

The Solution

- > **25 per cent reduction in man-hours processing accounting and ordering documents**
- > **Delivered a more streamlined and efficient process**
- > **Fully integrated with Navision**
- > **Better control of document storage, retrieval and distribution**

Recommended by Bishop Sports' IT reseller, Creative Computing, who have advised the company for many years, Spindle Professional was the natural partner to improve the efficiency of the company's document management. Used in tandem with Microsoft NAV, Spindle Professional has enabled Bishop Sports to gain a much greater control of its accounts documentation, enabling the business to run more smoothly and efficiently.

What They Have to Say

Seb Bishop, director of the Bishop Group of Companies says,

"I was instantly impressed by Spindle Professional's efficiency and effectiveness at being able to deliver on what it promised. This is where many software packages let themselves down, but Spindle Professional scores time and time again. I would have no hesitation in recommending it to anyone."
