

Spindle Report Scheduler

Regain control of your business data

Intelligent reporting for Sage 200

Manage your business-critical reports with Spindle Report Scheduler, reducing the risk of error and ensuring the right information is supplied to the right people, at the right time. Spindle Report Scheduler provides automation of key reports by setting up a delivery schedule, replacing the need to rely on human intervention during the manual process in Sage 200.

If your business needs to run any number of financial reports, whether weekly, bi-weekly, by the hour or even minute, Spindle Report Scheduler is the ideal solution.

Created as an in-built add-on module for Sage 200, Spindle Report Scheduler takes both your standard and customised Sage Reports and automates their delivery. This saves time and ensures quick delivery of important business information.

- Automates distribution of important reports to any user
- Access to real-time data
- Collect information from multiple data sources
- Create and deliver business reports
- Enables you to plan and make business decisions based on accurate data
- Easily run reports and provide these directly to your teams
- Schedule reports to run automatically
- Access reports at any time, from any device
